

Keyword Index for 1972

The index covers articles, bibliographies, book reviews, research reports, "Ideas for Discussion," "Discussion and Criticism," and "Urgent Anthropology" published in 1972. (Indexes for 1971 and for 1970 appear in CA 12:573-76 and 11:557-60, and a cumulative index for 1960-69 appears in CA 10:569-608.) It has two parts. The alphabetical part lists keywords, authors, and commentators (the latter distinguished by an asterisk) with the year of publica-

tion and the opening page number of the article to which each refers. The chronological part gives the main contents of the volume in order of appearance and lists the keywords and commentators for each. Keywords are selected by the authors or by the editorial staff from the text of articles and comments and adapted to conform to the restrictions imposed by the computer (see CA 7:632-33 for further discussion of keyword indexing). When a word must be

shortened to fit the space, the fact that letters are missing is indicated by a + (e.g., RESOURCE-REDISTRIB+). The same symbol is used between words to stand for "and" (e.g., CASTE+SUBCASTE). It will usually be clear from the context which of these meanings is intended. When a keyword is composed of two words that are to be indexed as one, the words are joined by a hyphen (e.g., EVENT-ETHNOGRAPHY). Users of the index may first locate keywords of interest in the alphabetical list and then find further information in the chronological list before going to the journal issue itself.
